

Class 2: Turtlebot

How to run it with NCA Chromebook

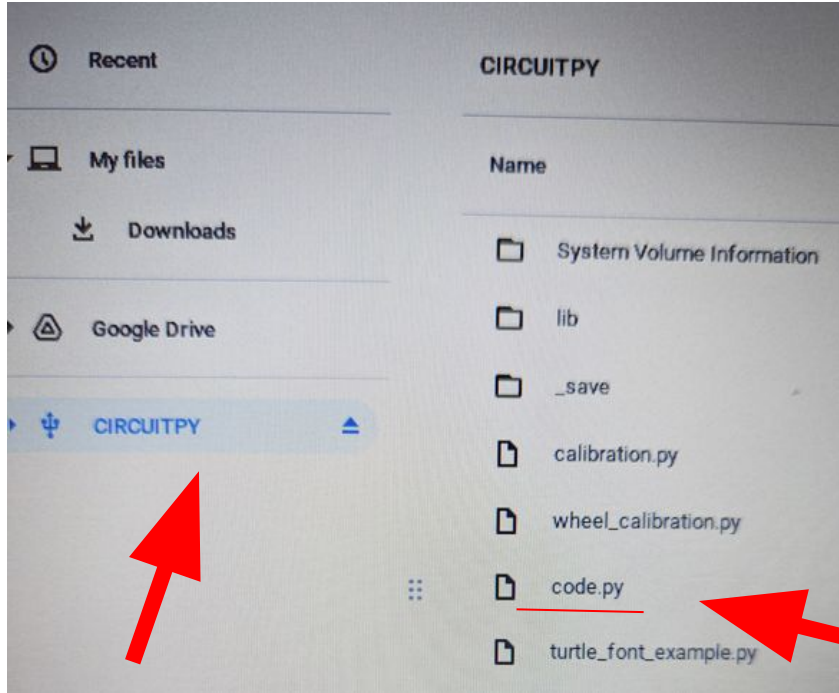

1. Connect via USB port on Chromebook
2. Load & Edit Program
3. Place paper & Load marker pen
4. Run Program

Connect Robot and Chromebook via USB cable

2. Load and Edit Program

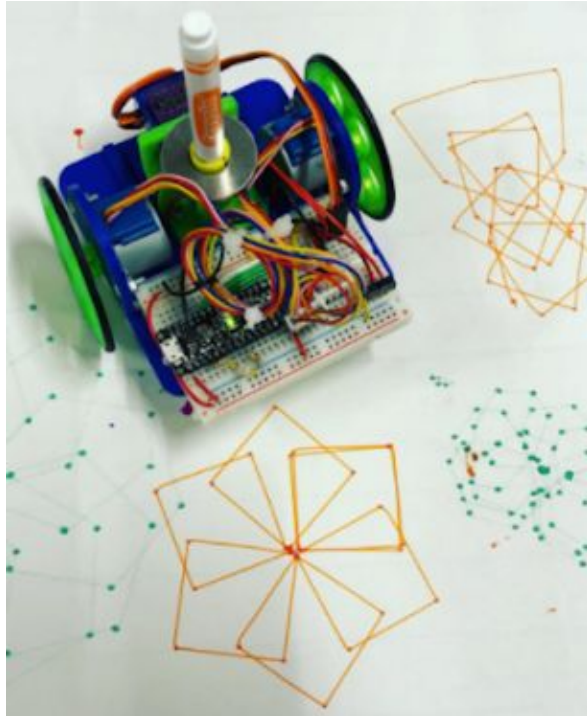

A

A. When your robot is connected, it will show up as a **USB drive** named **CIRCUITPY** in your Files app. Open it to display files.

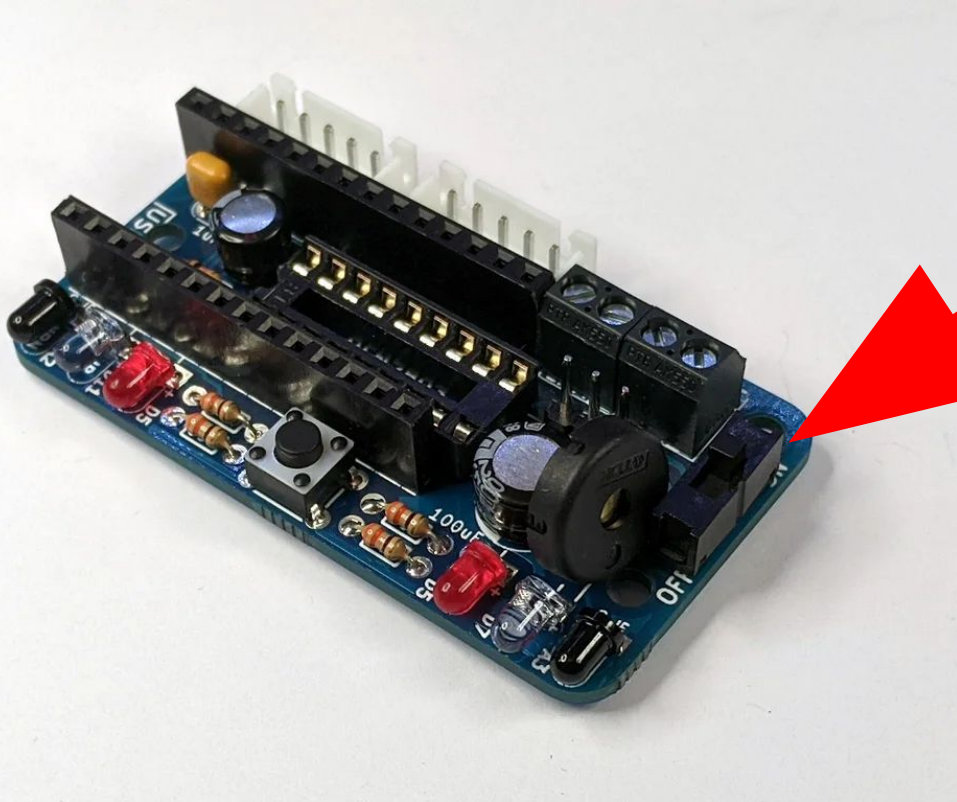

B. Double-click **code.py** to edit the main program. This is where the robot will look for instructions after powering up.

B

3. Place paper & Load marker pen

4. Run Program

Remove USB cable.

Turn ON power by sliding the switch toward the ON marker.

Your program **code.py** will start working if no error.
